-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi et al. 4,965,478. Kobayashi et al. discloses an electric motor having a brush holding portion 22, 22, 23, 23 as shown in figure 5 and a pigtail holding portion 58, 58 as shown in figure 7 wherein both portions 58 hold the pigtail in a lateral and longitudinal direction.

In regard to claim 3, see figure 7 which shows the two elements 58 as being close to one another.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. in view of Taniguchi et al. 6,429,553 B1. Kobayashi et al. discloses using his device in a motor vehicle in column 1, lines 40-43 but does not specifically mention a motor driven power steering apparatus. Taniguchi et al. discloses a brush commutated dc motor used for a power steering device. The Kobayashi et al. and the Taniguchi et al. patents are both assigned to Mitsuba Corporation of Gumma, Japan. Since Taniguchi et al. and Kobayashi et al. are from the

same field of endeavor it would have been obvious at the time the invention was made for one of ordinary skill in the art to have utilized the motor of Kobayashi et al. for a power steering device.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or teach a pigtail holding portion with a holding groove and a disassembly portion in combination with the other features of claim 4.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shioya et al. 6,664,699 B2 discloses a pigtail slot in column 3 lines 32-36 but does not disclose a disassembly portion.
